

Radiodetection Backpack and Transmitter Bag

A convenient new way to transport a precision cable and pipe locator system

Carrying all your equipment to a job isn't easy. You need your hands free to study maps and drawings as well as carry all your tools.

Backpack

Designed to be comfortable for long periods

High visibility colouring and reflective strips, for extra safety when working at night

Spacious interior for carrying a transmitter and other items

Multiple pockets for spray paint cans, hand tools and other items

Padded straps and foam back covered in Airmesh, for increased user comfort

External sleeve with Velcro release to hold any precision locator easily and securely

Transmitter bag

Clear panel for complete control of the transmitter without opening the bag

Securely holds your transmitter without the tool tray

Easy access to the accessory socket
